Just look at those cakes and cookies, doesn't it feel like you're in the Chocolate Factory! Unbelievably, all those mouthwatering and delightful pastries are for real. They don't only look appetizing, but they really have a divine taste. Every single cookie and cake is homemade by Hala Beydoun at her household factory Cocoa & Co. Hala works on every single masterpiece adding the best ingredients and using various flavors, refining it with her unique designs. They are not only for your kids, you can always spoil yourself with the best pastries. You have the privilege of personalized designs from cakes to cupcakes, brownies and cookies. You would probably get lost with all the beautiful designs, but eventually you will find what best suits you. Just imagine if you could have the best souvenirs for your guests, but not just any souvenir, a souvenir that will leave a great taste in their mouth and a delicious memory of your special occasions. Let's take a quick look at the various choices you have here. For weddings and engagements, there are the tiered cakes that have rejuvenated natural colors and great taste. On your guests' tables, you can add personalized cookies to the decoration that will marvel them with its crunchy taste. Another option would be the funky multi-colored cake decorated with sugar fondant cookies and candy ribbons as well as mini silver sugar balls. As for flavors, her luscious range of natural flavors is unforgettable specifically orange, banana, ginger, vanilla and chocolate. As for birthdays and other occasions, Hala is known for her handling of mini sugarcoated chocolate decorations, caramel popcorn sticks, character cakes, and not to forget the elements of fun and creativity that attract attention to both design and taste.

Hala Beydoun would like to thank Ms. Nayla Bassili and Ms. Maha Masri for their support. She owes her success to these two great women.
